Home Theater Rear Speaker Placement?

Image taken on 2007-07-04 09:57:20 by familymwr.

I just moved into an apartment with the girlfriend. I figured a nice 5.1 home theater system would be a fun addition. The thing is, with the layout of my place (having the tv in the corner) I would like to hear opinions from people who know more than I do about the placement of the rear speakers. (Please keep note that the furniture wont be rearranged)

Here's a link to a drawing of my layout.

Please let me know the best positions for the 2 back surround speakers.
